SUMMARY

Full Stack Software Engineer with 4+ years of experience designing scalable, high-performance systems in fintech, blockchain, and e-commerce domains. Proficient in Java, Spring Boot, and AWS. Skilled in microservices, cloud-native architecture, and real-time data processing. Certified AWS Developer and Oracle Java Programmer. Adept at building resilient distributed systems.

CORE PROFICEINCIES

Languages	Java, JavaScript, Python, Go, SQL, Dart
Frameworks	Spring Boot, React.js, Flutter
Cloud & DevOps	AWS, Docker, Kubernetes, GitHub Actions
Databases	PostgreSQL, Oracle DB, MySQL, MongoDB
Messaging & Streaming	RabbitMQ, WSO2 ESB
Other Tools	Prometheus, Grafana ,WSO2, Test containers, Junit, gprc

PROFESSIONAL EXPERIENCE

Software Engineer (Remote, Part Time)

Sep 2023 – Present

OFFCode solutions (PVT) Ltd

- High-Frequency Event Trading Engine: Developing with Java, Go lang, RabbitMQ, and Kubernetes; handles 1,000+ orders per minute.
- Designed and developed an HR work hour calculation system to optimize workforce productivity.

Software Engineer (Full time)

Mar 2022 – Aug 2023

OFFCode solutions (PVT) Ltd

- Involved in the development of Rightsmint.com, an NFT blockchain project integrating smart contracts.
- Automated garment project design processes, reducing manual work and improving workflow efficiency improved productivity by 30%.
- Built a Point-of-Sale (POS) and e-commerce system integrated with a mobile-based food delivery app for Brazen Brownie, handling over 1,000 monthly transactions and enabling seamless real-time order, inventory, and payment management.
- Developed a mobile-based financial application to enhance personal banking features by flutter.
- Developed a B2B e-learning platform with online exams, video tutorials, and automated grading, using Java, Spring Boot, MongoDB, and AWS — serving over 100,000 users.

Java Software Engineer

Dec 2020 – Mar 2022

Hitachi Digital Payment Solutions (PVT) Ltd

- Enhanced financial settlement modules to support Visa & Mastercard mandates.
- Leveraged Java multithreading parallelizes BIN extraction logic, enhance throughput and responsiveness for large-scale transaction processing.
- Updated reconciliation modules quarterly for Visa/Mastercard compliance.

- Improved database performance for Vattanac Bank, FTB Bank Cambodia, and Nepal Bank by adding indexes and applying optimization techniques such as query tuning and schema refinement, resulting in faster transactions and reduced load times.

Java Software Engineer

Sep 2019 – Nov 2020

Apigate (PVT) Ltd (*Currently known as Boost Connect*)

- Set up WSO2 ESB for LMS & data integration for University College London.
- Contributed to WSO2 API Manager & Identity Server bug fixes & configurations.
- Implemented AWS-Mailchimp integration & automation.

EDUCATION

BSc (Hons) in Industrial Information Technology (*Special*)

Feb 2016 – Mar 2020

Uva Wellassa University – Sri Lanka

Volunteer Experience

<https://www.wildtrack.org/>

Assisted in developing a Flutter application and enhancing the existing app UI

Feb 2024 – April 2024

CERTIFICATIONS

- **AWS Certified Developer – Associate**
- **AWS Certified Cloud Practitioner**
- **Cisco Introduction to Cybersecurity**
- **Oracle Certified Java Programmer**
