SUMMARY

Cloud & DevOps-focused Software Engineer with 4+ years of experience building scalable, distributed systems. Strong hands-on experience with Kubernetes, Docker, AWS, and observability tools like Prometheus and Grafana. Proven ability to work with high-throughput systems and improve system reliability. Actively building DevOps projects in CI/CD, Infrastructure as Code, and monitoring.

CORE SKILLS

Cloud & DevOps: AWS, Docker, Kubernetes, GitHub Actions, CI/CD, Linux, Bash

Monitoring & Observability: Prometheus, Grafana

Programming: Java, Python, Go, JavaScript

Databases: PostgreSQL, MySQL, MongoDB, Oracle

Messaging: RabbitMQ

DEVOPS PROJECTS (SELF-INITIATED)

Kubernetes Microservices Deployment

- Deployed containerized microservices on Kubernetes (Minikube/EKS)
- Configured services, deployments, and ingress
- Debugged pods using logs, events, and kubectl tools

CI/CD Pipeline Implementation

- Built CI/CD pipelines using GitHub Actions for build, test, and deployment
- Automated Docker image builds and deployments

Monitoring Stack Setup (Prometheus + Grafana)

- Set up Prometheus metrics collection and Grafana dashboards

- Created dashboards for system metrics and application monitoring

Infrastructure as Code (Learning Terraform)

- Created basic infrastructure (EC2, networking) using Terraform
 - Practicing modular and reusable IaC patterns
-

PROFESSIONAL EXPERIENCE

Software Engineer (Part-Time)

OFFCode Solutions | Sep 2023 – Jul 2025

- Developed high-throughput event-driven system using Kubernetes and RabbitMQ
- Deployed and managed containerized services in distributed environments
- Improved system performance and reliability under load (1000+ events/min)

Software Engineer

ProjeXSpace | Mar 2022 – Aug 2023

- Built scalable backend services using Java, Spring Boot, and AWS
- Worked with cloud-based deployments and microservices architecture
- Automated workflows and improved system efficiency

Java Software Engineer

Hitachi Digital Payment Solutions | Dec 2020 – Mar 2022

- Developed high-performance financial systems with multithreading
- Optimized database performance and improved transaction throughput

Java Software Engineer

Apigate (Boost Connect) | Sep 2019 – Nov 2020

- Integrated enterprise systems and APIs using WSO2
 - Worked on system configuration, deployment, and maintenance
-

EDUCATION

BSc (Hons) in Industrial Information Technology
Uva Wellassa University – Sri Lanka

CERTIFICATIONS

- AWS Certified Developer – Associate
 - AWS Certified Cloud Practitioner
 - Oracle Certified Java Programmer
 - Cisco Introduction to Cybersecurity
 - Certified Kubernetes Administrator (CKA) – In Progress (Hands-on labs with Kubernetes, Pods, Services, Debugging)
-

ADDITIONAL INFORMATION

- Strong understanding of distributed systems and system reliability
- Familiar with Linux environments and command-line tools
- Actively improving skills in Terraform, ArgoCD, and cloud-native DevOps practices
